SUMMARY

A full-stack software developer with experience in developing and maintaining scalable web applications. Proficient in building responsive front-end interfaces, robust back-end services, and mobile applications

WORK EXPERIENCE

Zeus Atlas—IT Skills Facilitator, *Feb 2026*– Present

- Deliver comprehensive IT and full-stack development training, equipping students with practical skills in productivity tools, front-end technologies, Node.js, MySQL, and application deployment.
- Provide mentorship and technical support to help students troubleshoot coding challenges and improve problem-solving skills

Amalitech—Frontend Developer, *Oct 2024–Sept 2025*

- Worked closely with designers, developers, and product teams to deliver responsive, accessible, and high-performing web applications.
- Developed scalable and efficient solutions using modern frontend technologies, including Next.js, TypeScript, Storybook, and CMS.
- Worked on a multilingual e-commerce platform with full CMS integration and a travel advisor app that enables users to plan trips, collaborate, and explore destinations.

Myecentials—Software Developer *Dec 2023–Apr 2024*

- Contributed to the development of a hospital and pharmacy management system using React and Redux.
- Implemented key features to track sales, withdrawals, and deposits and to generate detailed sales reports for efficient financial management.
- Conducted performance optimizations and code reviews to ensure high efficiency, scalability, and maintainability.

Zap Technologies—Web **Developer,** *Sept 2023–Dec 2023*

- Led a team of interns to leverage Next.js for server-side rendering and performance optimization, resulting in faster load times and improved SEO rankings.
- Guided the implementation of TypeScript to ensure type safety, reduce bugs, and maintain robust,

scalable codebases.

- Oversaw the development of dynamic and responsive user interfaces with React, enhancing user experience and overall engagement.

EDUCATION

Kwame Nkrumah University of Science and Technology (KNUST), *Jan 2021 – Nov 2024*

B.Sc. Computer Engineering - First Class Honors

CERTIFICATIONS

- AWS Cloud Practitioner *Feb 2025*
- ALX Software Engineering *Mar 2023*

SKILLS, TOOLS

Programming Languages: JavaScript (React, NextJS), TypeScript, HTML5, CSS3, React Native/Expo

Backend & Tools: Git/GitHub, Node.js, ExpressJS, MongoDB, PostgreSQL

Tools & Productivity: Canva, Microsoft Office (Word, Excel, PowerPoint), Google Workspace

SELECTED PROJECTS

SleekTeq—Company website: sleekteqsolutions.com

• Developed and deployed the Sleekteq company website, a modern, responsive website to showcase the company's services and strengthen its online presence

• Integrated Google Analytics, enabling real-time customer engagement and providing actionable insights into user behavior and site performance.

AutoEase – E-commerce Website: autoeaseafrica.com

• Developed a full-stack e-commerce application for a wheelchair company in Ghana, including an admin dashboard for seamless management of products and orders

• Integrated secure payment systems and real-time order tracking to enhance reliability and user experience.

VOLUNTEERING

Zap Technologies - Instructor, *Feb 2024 – Apr 2024*

• Provided comprehensive web development training to students at KNUST through hands-on projects and interactive learning sessions.

• Mentored participants in building real-world applications using modern web technologies, fostering practical skills and industry readiness.
